Important: the DVR is not intended to be a long-term storage device. When saving recordings, consider the impact of the save time on your storage space. Keep in mind that once you reach your space limitation maximum, old shows will be deleted automatically as new shows are recorded. To avoid losing old shows that you want to keep, it's best to clear out your queue every few days of shows you no longer wish to save.

Pause and Rewind Live TV

One of the coolest features of the DVR is the real-time features. You can pause or rewind shows as you watch them - even if you aren't technically "recording" the program. Just use the **Pause** button if you need to step away for a few minutes, then press **Play** when you return, or **Rewind** to review a scene. The program will automatically stop recording when it ends.

*Tip: press **Pause** when your program starts, then wait to start watching it five minutes after it starts by selecting the **Play**. This will enable you to **Fast Forward** through all of the commercials, since you will be watching it five minutes behind schedule.*
